Hi Laurianne, Sharon,

The Denver Public Library and the Colorado History Museum may have historic photographs which could provide an "on the ground" perspective. Please let me know if we should pursue this.

Thank you,

Lindsay Garner | Project Manager

Hi Lindsay

Thank you for this. One quick question, is there any way to get closer images? I was hoping to have a picture where you could actually see the structures (crib wall, etc.). This may not be possible but want to make sure I am clear about what I had hoped to find.

Thanks again

Subject: Aerial Photographs - Nelson Tunnel Site (TO-005)

Sharon, Laurianne,

As requested, Toeroek searched for and obtained aerial photograph images of the Commodore Waste Rock Pile (CWRP) at the Nelson Tunnel Site in Mineral County, Colorado (TO-005). The search was focused on the time period of 1972 to 1989, when MECO and CoCa were active in the Site area.

Although there are aerial images for various years within timeframe, the resolution varies considerably and some photos did not provide a high enough resolution to discern features of the CWRP. Toeroek found images of adequate resolution for the years 1975, 1978, and 1981 from the U.S. Geological Survey. These images with the CWRP boundary overlaid are included in the attached map. A 1954 aerial photograph of the CWRP has also been included to provide a historical reference.

Please feel free to contact me with any questions or comments.

Thank you,

Lindsay Garner | Project Manager
